DYNAMIC
LEARNING MAPS

Augmentative Alternative Communication (AAC)

Students with limited verbal communication skills, may need an alternate way to 'communicate their choices' and 'read their sentences', Examples:

- sign language
- objects
- pictures
- symbols
- braille
- tactile symbols
- eye gaze
- print (type their words)
- Voice Output Devices

Modeling and Expanding Core Vocabulary Activity #1

Directions: Use the core vocabulary board. Work with a partner to think of how you might model the use of these single words in an art activity or a science lesson about recycling. Write a brief description of how you could model each word. If your student chose one of these core words, how could you expand it to a phrase using another core word? Be prepared to share your work at the end of this activity.
